(2011-01-21) The four radioactive series of heavy nuclides: Successive decay products of a heavy nucleus stay in one of four series. Since the above standard decay modes either decrease the mass number (A) by 4 units or leave it unchanged, there are 4 standard radioactive families or series. The mass number modulo 4 is characteristic of each series.

Eutrophication (from Greek eutrophos, "well-nourished"), or hypertrophication, is when a body of water becomes overly enriched with minerals and nutrients which induce excessive growth of plants and algae. This process may result in oxygen depletion of the water body. One example is an "algal bloom" or great increase of phytoplankton in a water body as a response to increased levels of nutrients.

Israel is believed to have begun full-scale production of nuclear weapons following the 1967 Six-Day War, although it had built its first operational nuclear weapon by December 1966. A CIA report from early 1967 stated that Israel had the materials to construct a bomb in six to eight weeks and some authors suggest that Israel had two crude bombs ready for use during the war.

It is! But really the exciting part is the MSR. Yes Thorium is exciting too because there's so much of it around. However

thorium itself is not fissile and must be converted to Uranium-233.

The measurement of ion mass is an important tool for scientists over a wide range of disciplines, and mass is reported either as  
a. Nominal mass—the mass of an ion or molecule calculated using the mass of the most abundant isotope of each element rounded to the nearest integer value and equivalent to the sum of the mass numbers of all constituent atoms.

Abstract. The radiopharmaceutical <sup>123</sup>I-metaiodobenzylguanidine (MIBG) was approved by the Food and Drug Administration in March 2013 for the assessment of myocardial sympathetic innervation in the evaluation of patients with heart failure and an ejection fraction of no more than 35%. Almost any well-equipped nuclear medicine or nuclear cardiology laboratory can perform this test, although ...

The first deuterated drug has finally been approved by the FDA. It's Austedo (deutetrabenazine), from Teva, and it targets Huntington's chorea. This is an interesting development on several levels. The idea of adding deuteriums (instead of plain hydrogens) to drug structures had been kicking around for many years, but only in the last 8 or 10 years has serious development been underway on them.

Temperature is another important variable. The above properties were measured at room temperatures. As temperatures

increase up to the limit of 1,063°F (573°C) mentioned in Endnote 81, the piezoelectric coefficient increases and breakdown voltages decrease—both contributing to more extensive and powerful plasma production.. 81.

Vitamin A is Still a Vitamin. In a recent newsletter, Dr. John Cannel of the vitamin D council warned against taking cod liver oil as a source of vitamin D, because retinols – preformed vitamin A – interfere with the function of vitamin D. Dr. Cannel suggested obtaining omega-3 fatty acids from fish oils and vitamin A from carotenes. 4 Such advice elevates the status of vitamin D over ...
